

Biodiversity Quadrat

Instructions

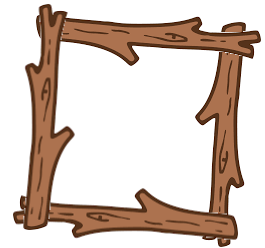

Materials Needed:

- 4 equal length sticks
- Twine
- Scissors

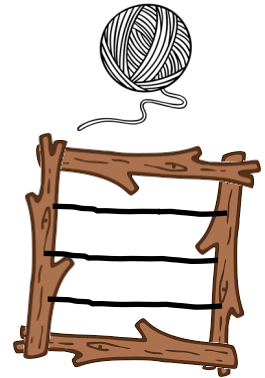

Step 1: Make sure the sticks are equal length. Remove any protruding branches.

Step 2: Assemble the 4 sticks into a square. Use the twine to tie the corners together.

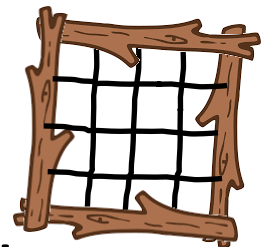

Step 3: Cut 6 equal length pieces of twine for the internal grid.

Step 4: Tie 3 strings horizontally on the square with equal distances apart.

Step 5: Tie 3 strings vertically on the square with equal distances apart.

Please send pictures of you using your quadrats!
